Trailer coupling with ESP® trailer stabilisation [550]

£950

Expand your transport options: With the trailer hitch, you can hitch up trailers as well as mount bicycle racks. The trailer hitch is ready for use in no time at all - and can be folded in behind the rear bumper just as quickly when it is no longer needed.

- Tow Bar -

ESP® trailer stabilisation: when towing a trailer, ESP® trailer stabilisation can automatically intervene in critical situations. Your vehicle recognises the trailer automatically as soon as the electric plug is connected. The ESP® stabilisation functions are automatically active from a speed of 65 km/h. If undesirable swaying movements are detected, the trailer stabilisation actively dampens them with the help of wheel-specific, reciprocal brake applications. In most cases this is already sufficient to reduce dangerous vibrations. If necessary, the system also reduces the speed: for this, the engine torque is reduced, and the vehicle is braked at all four wheels.

Trailer mode: in a menu on the central display, select your trailer type and enter the maximum permissible speed. This allows your vehicle to adapt the functions of the speed limit assistant for trailer operation, for example.

DC Charging [83B]

£850

In addition to the 800V Charging capability that comes as standard on CLA, with this optional direct current charging system, you can charge your vehicle with up to 100 kW at compatible 400V fast-charging stations too.

With the direct current charging system, you can charge your vehicle with up to 100 kW at compatible fast-charging stations.

These supply the direct current required for your high-voltage battery - and the system provides the best possible electric range in a short time.

Lossless charging: when converting alternating current (AC) into direct current (DC), losses are incurred which are noticeable in the form of heat. A direct connection to direct current avoids these losses - the battery can be charged with higher power. When charging with direct current you use the European charging standard called the Combined Charging System (CCS).

High-voltage safety concept: the charging process switches off automatically if the vehicle is stationary and a collision is detected when using fast charging. For this purpose, a special sensor system is fitted to the DC box.

Please note, the navigation will still recommend the fastest, most convenient 800V charging stations on your journey and updates the availability in real-time.

¹The indicated values were determined according to the prescribed measurement method -Worldwide Harmonised Light Vehicle Test Procedure (WLTP). Figures shown may include options which are not available in the UK. Battery Electric Vehicles (BEV) require mains electricity for charging; range figures determined with the battery fully charged. These models require mains electricity for charging *Figures shown are for comparability purposes; only compare with other cars tested to the same technical procedures. Figures may not reflect real life driving results, which will depend upon a number of factors including factory-fitted options, accessories fitted (post registration), variations in weather, driving styles and vehicle load. Further information about the test used to establish fuel consumption and CO₂ figures can be found at <http://www.mercedes-benz.co.uk/WLTP> ²A different first year rate of Vehicle Excise Duty (Road Fund Licence) applies for new cars. ³The recommended on-the-road price includes the Road Fund Licence applicable to the standard model plus delivery charge (£780.00 incl. VAT), new vehicle registration fee (£55.00) and number plates (£25.00 incl.VAT). VAT is calculated at the standard rate of 20%. Some of the model features, optional extras and colours shown may not be available, or may only be available in a different specification, or at a different price.

Please note, all digital extras are available with a one-month free trial period. All Digital Extras are available via the Mercedes-Benz online store via the following link: <https://shop.mercedes-benz.com/en-gb/connect/cat/ALL/available>. Once purchased, the features will become live via an over-the-air update to the vehicle. Prices subject to change. 1-year and Permanent activation options are also available via the store.

The use of certain Digital Extras requires the continuous acceptance of the Terms of Use for Digital Extras and the Mercedes me ID Terms of Use in their respective current versions, the permanent pairing of the vehicle with the Mercedes Benz user account, the consent to the storage and retrieval of necessary information to activate some Digital Extras within the paired vehicle and - where applicable - the activation of the Digital Extras. The connection of the communication module to the mobile network, including the emergency call system, depends on the respective network coverage and availability of the network providers. Please also refer to any instructions in your vehicle's operating manual.

✓ Already part of vehicle standards, • Available as Digital Extra.

Trailer coupling with ESP® trailer stabilisation [550]

£950

Expand your transport options: With the trailer hitch, you can hitch up trailers as well as mount bicycle racks. The trailer hitch is ready for use in no time at all - and can be folded in behind the rear bumper just as quickly when it is no longer needed.

- Tow Bar -

ESP® trailer stabilisation: when towing a trailer, ESP® trailer stabilisation can automatically intervene in critical situations. Your vehicle recognises the trailer automatically as soon as the electric plug is connected. The ESP® stabilisation functions are automatically active from a speed of 65 km/h. If undesirable swaying movements are detected, the trailer stabilisation actively dampens them with the help of wheel-specific, reciprocal brake applications. In most cases this is already sufficient to reduce dangerous vibrations. If necessary, the system also reduces the speed: for this, the engine torque is reduced, and the vehicle is braked at all four wheels.

Trailer mode: in a menu on the central display, select your trailer type and enter the maximum permissible speed. This allows your vehicle to adapt the functions of the speed limit assistant for trailer operation, for example.

¹The indicated values were determined according to the prescribed measurement method -Worldwide Harmonised Light Vehicle Test Procedure (WLTP). Figures shown may include options which are not available in the UK. Battery Electric Vehicles (BEV) require mains electricity for charging; range figures determined with the battery fully charged. These models require mains electricity for charging ²Figures shown are for comparability purposes; only compare with other cars tested to the same technical procedures. Figures may not reflect real life driving results, which will depend upon a number of factors including factory-fitted options, accessories fitted (post registration), variations in weather, driving styles and vehicle load. Further information about the test used to establish fuel consumption and CO₂ figures can be found at <http://www.mercedes-benz.co.uk/WLTP> ³A different first year rate of Vehicle Excise Duty (Road Fund Licence) applies for new cars. ³The recommended on-the-road price includes the Road Fund Licence applicable to the standard model plus delivery charge (£780.00 incl. VAT), new vehicle registration fee (£55.00) and number plates (£25.00 incl.VAT). VAT is calculated at the standard rate of 20%. Some of the model features, optional extras and colours shown may not be available, or may only be available in a different specification, or at a different price.

¹Figures according to Directive 80/1269/EEC in the currently applicable version. ²Mass of the vehicle in running order with at least 90% full fuel tank, plus the mass of the driver (estimated by law at 75kg), fuel and fluids, equipped with the standard equipment as specified by the manufacturer as well as, where applicable, the mass of the body, cab, trailer coupling and spare wheel(s) as well as tools. Optional extras, additional equipment and accessories can influence the weight, residual payload, rolling resistance, aerodynamics, etc., and therefore also affect the consumption/CO₂ values. Further information about the test used to establish range, power consumption and CO₂ figures can be found at www.mercedes-benz.co.uk/WLTP. Specified voltage and current values refer to network infrastructure and can be limited by the vehicle.

Technical Data

All measurements in millimetres. The dimensions shown are mean values and apply to standard specification, unladen vehicles.

¹Figures shown are for compatibility purposes; only compare with other cars tested to the same technical procedures. Figures may not reflect real life driving results, which will depend upon a number of factors including the starting charge of the battery, factory-fitted options, accessories (post registration), variations in weather, driving styles and vehicle load. Further information about the test used to establish range, power consumption and CO2 figures can be found at www.mercedes-benz.co.uk/WLTP.

Effective from April 2026 production. Information correct at time of publication 14.07.2026. Prices and specifications are subject to change without prior notice.
